## accucold

# **ARS8PVDL2B**

### 50" x 23.38" x 24.38" (H x W x D)

Performance series Pharma-Vac 8 cu.ft. upright allrefrigerator for vaccine storage with factory-installed data logger

#### **Highlights:**

NIST calibrated DDL included for accurate temperature logging

Intelligent microprocessor digital temperature controller

Improved temperature accuracy with a separate temperature probe for continuous product readout to simulate stored product temperature

Designed and purpose-built for pharmacy, medication, and vaccine applications to support meeting CDC/VFC guidelines
The published temperature variation is derived from the maximum deviation of an NTC sensor in a 1 oz. vial located nearest the chamber geometric center during a 24 hour test period
Intuitive controls let you adjust the interior temperature between +2 to +8°C
Accucold DL2B data logger is NIST calibrated in our ISO/IEC 17025:2017 laboratory, with user-set logging intervals, a large LCD readout of the current and high/low temperature, and virtually unlimited storage through internal memory and a convenient USB drive; for additional information on this logger's features, view the DL2BKit on our webiste
Visual and audible alarms alert if the interior temperature rises or falls out of set range
Electronic controller is equipped with a volt-free contact for alarm forwarding to an external remote system (contacts located in the external rear of the unit)
Adjustable cycle defrost operation ensures the unit avoid temperature spikes and ice buildup
Includes a pre-installed 1/2" probe hole in the right interior wall to allow easier connection to user-provided monitoring equipment
