CLAVE8+

THE FLIGHT CLAVE8+

Is a high-performing, compact Class S autoclave uniquely designed for fast, efficient, and reliable sterilization in diverse professional environments. Its advanced steam pulsing, air-assisted drying, and safety features make it a standout choice where both speed and safety matter.

Drying & Efficiency Upgrades

- Integrated compressor / vacuum system accelerates drying—cutting closed-door drying time from ~60 minutes to ~30 minutes.
- Air-assisted closed-door drying ensures instruments are fully dry and ready to use at the end of the cycle.
- 8L chamber (6.7"× 12.6") with three stainless-steel trays, delivering greater sterilizing capacity than single-cassette sterilizers while maintaining comparable cycle times.
- Independent steam generator, double-door protection system, USB port, and internal printer support both safety and documentation.

BEST FOR:

Excellent sterilizer for use in Dental offices, Veterinarian offices, Medical offices, Podiatry, Chiropractic, Tattoo and Beauty salons.

9 CHAMBERT

Built in compressor for
Faster Drying Times
30 Minutes Closed Door Drying

SAFETY

- The double-door protection system ensures safe operation by preventing the cycle from starting unless the door is securely locked. It also prevents the door from opening until the pressure inside the chamber has equalized with atmospheric pressure outside the chamber
- Pressure safety valve prevents over pressure in the chamber and steam generator.
- The power is automatically cut if a short circuit or electrical fault occurs.
- The system is able to detect any problems or faults with the machine using specific error codes making diagnosing and trouble shooting much easier and faster.
- A built-in water level sensor monitors minimum and maximum levels and alerts the user accordingly.

STERILIZATION PROGRAMS

Pre-Programmed Cycles Cover all common dental, medical and veterinary sterilization needs.

Programs	Temp °C	Pressure k.Pa	Type	Total time (Mins)
Unwrapped	134	210	Unwrapped solid material	14-30
	121	110		30-45
Wrapped	134	210	Wrapped solid or hollow material	30-45
	121	110		35-60
Liquid	134	210	Liquid	30-55
Plastic	121	110	Plastic	35-60
Prion	134	210	Unwrapped porous material	Total 30-55
			Single-wrapped porous material	
			Single-wrapped hollow material	
			Dual-wrapped solid & hollow material	

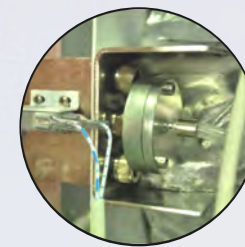

“

Compact in Size but Powerful and Fast Sterilization.
Suitable for all your Dental, Medical, Veterinary, Tattoo and
Beauty infection control needs

FEATURES

- Unique Pressure-Pulsing Steam Injection
- Intuitive and Easy to Use Touchpad
- Fast and Efficient Steam Sterilization
- Includes USB Port for Data management
- 5 Programmed Cycles
- 3 Tray Capacity (16L Capacity - 9" Chamber)
- High Quality 304 Stainless Steel
- Built-in Printer Included
- 2 Year Warranty

DOCUMENTATION

Printer:

A Built in Printer is included with all models (Clave8+, Clave16+, Clave23+, Clave28+, Clave45+, ClaveB)

USB port:

All sterilization data from each cycle will be recorded to the USB Flash drive when it connected. Each cycle is saved as a ".txt" file that can be opened on any PC.

Internal memory :

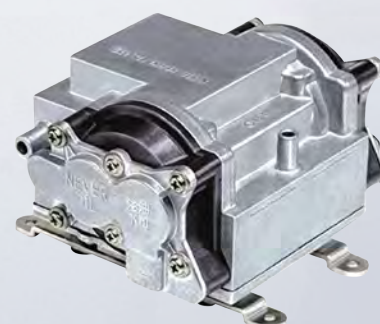

The last 10,000 cycles are automatically stored in the autoclave system, which can be printed out at anytime.

STERILIZATION PROGRAMS

Pre-Programmed Cycles Cover all common dental, medical and veterinary sterilization needs.

CLASS S

CLAVE28+

FULLY AUTOMATIC

FEATURES

Large 28L Chamber Capacity

Designed to accommodate a higher volume of instruments—ideal for busy dental offices needing efficient sterilization of larger loads.

LCD Control Panel

LCD interface with pre-set sterilization programs for wrapped, unwrapped, and Prion cycles.

Built-In USB Data Logger

Automatically records cycle data for easy transfer and storage—ensuring compliance with record-keeping requirements.

Durable Stainless-Steel Chamber

11" chamber autoclave to replace existing same size autoclaves without having to change cassettes.

Compact Countertop Design

Space-saving design that fits seamlessly into modern sterilization centers.

BENEFITS

Enhanced Efficiency – Sterilizes more instruments in fewer cycles, increasing productivity and reducing wait times.

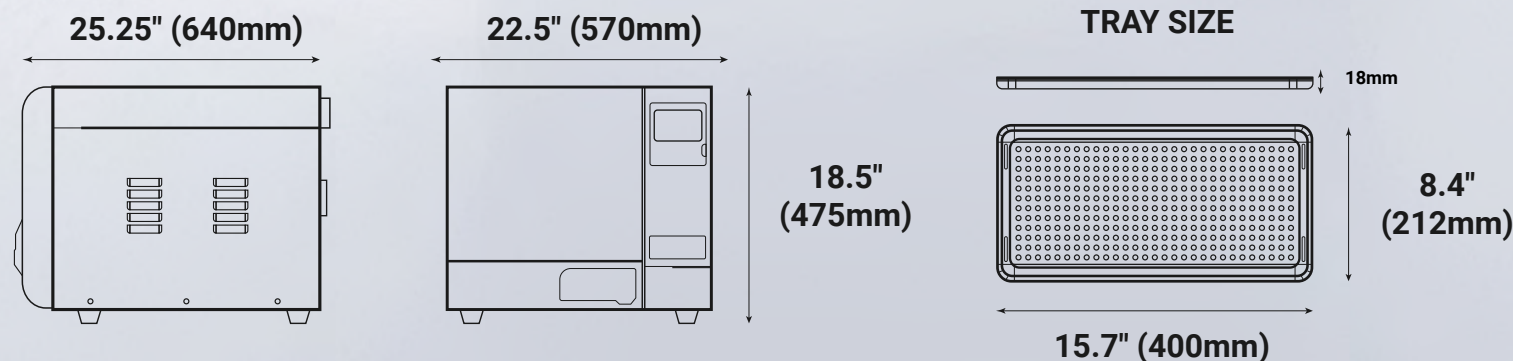

User-Friendly Operation – Simple interface eliminates guesswork and training time.

Regulatory Compliance – Automatic data recording meets Health Canada and FDA documentation requirements.

Patient & Staff Safety – Multiple safety interlocks and real-time monitoring ensure safe operation.

Cost-Effective – Low maintenance design and efficient cycle times reduce overall operating costs.

Reliable Performance – Engineered and tested to meet international standards (ISO 13485, CE, ETL).

CLASS B

FULLY AUTOMATIC

CLAVE B

FEATURES

Optimized tank concept, simple opening method, convenient water filling and easy cleaning.

The LCD display uses a dynamic graphical appearance that will show the whole process of sterilization, including all stages of time, temperature and pressure.

The **Clave B** is equipped with a standard USB 2.0 interface that automatically records the data of each sterilization cycle in a "TXT" file.

The last 10,000 sterilization reports will be saved on an internal memory and can be transferred to a USB drive or printed at any time.

The display shows distilled water level, waste water level, printer connected and do or locks symbols.

A specific error code is displayed to facilitate trouble shooting.

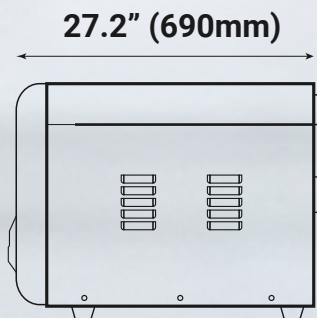

SAFETY

The Clave B is compact and clean with a unique door design that hides the printer, USB Interface, Water drain ports and power switch.

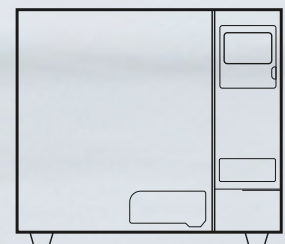

The Clave B uses both a mechanical hook type door lock and an electric door lock for added safety when a sterilization cycle is running.

The microswitch for the door locking systems ensures that the cycle cannot start if the door is not closed.

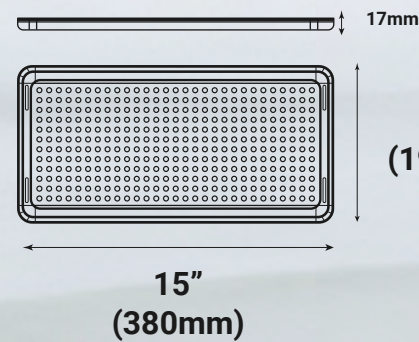

27.2" (690mm)

19.3" (490mm)

17.9" (455mm)

TRAY SIZE

DOCUMENTATION
Built-in printer, can automatically print the report at the end of each cycle.

CLASS B

FULLY AUTOMATIC

CLAVE B

Vacuum Pump
High quality german made vacuum pump is extremely quite. Creates optimal air removal and closed door drying for the sterilizer.

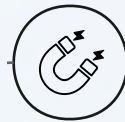

Safety Valve

The pressure release valve ensures that the pressure can be mechanically released if it over pressurizes

Steam Release Ports

A large caliber steam release port on the back of the device prevents water droplets from dripping on your counter and releasing steam unnecessarily.

Solenoid Valve

A high quality solenoid valve from Italy provides better performance and reliability, which prevents any leakage or additional maintenance.

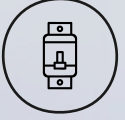

Heat Exchange Cooling Vent

The heat exchange and cooling fan, cools the steam prior to reaching the waste water reservoir and exhaust vent, so that minimal hot air and moisture is exhausted out.

Bacterial Filter

Premium bacteria filter increases filtration efficiency and reduces maintenance required.

Circuit Breaker

UL approved circuit breaker automatically trips when the current is not stable or there is a short circuit to prevent damage to the device.

FLIGHT ULTRASONIC CLEANER

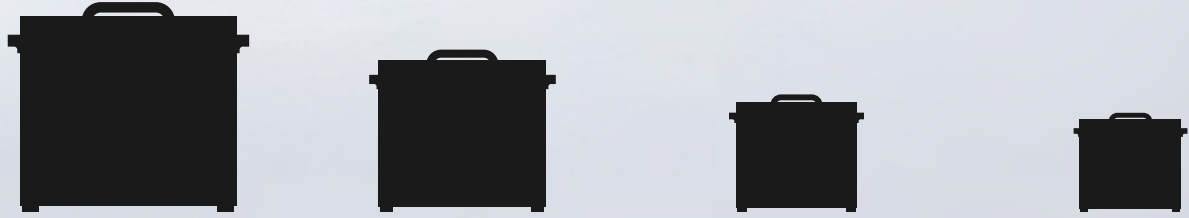

Simple to Operate

The Flight SonicArc is easy to use right out of the box, so you can get your staff up and running with minimal training time. Features like a digital LCD control panel that displays prompts, options for preset or customized settings, intelligent software that remembers the last cycle settings, and a fluid sensor that ensures the bath always has sufficient water levels help simplify your processes and increase productivity.

- LCD Digital Display
- Multi-function Integration
- High-Precision Temp Control
- Dynamic Light Bar

SAFETY

Optimize your cleaning process with the Flight Ultrasonic Cleaner, available in four convenient sizes: 3.2L, 6.5L, 10L, and 22L. Designed for dental, medical, veterinary, laboratory, industrial, tattoo, and eyewear applications, this intelligent cleaner features an LCD digital display, high-precision temperature control, and a dynamic light bar for simple operation. Its ultra-powerful ultrasonic technology ensures thorough cleaning while minimizing worker exposure to contaminants and sharps. With a sleek, modern design and advanced functionality, the Flight Ultrasonic Cleaner is a smart, safe, and stylish addition to any workspace.

Range of sizes and design options

The SonicArc comes in four table top sizes (3.2L, 6.5L, 10L, 22L), So you choose the option that best fits your configuration and workflow. And the stainless steel finish and attractive design coordinate well with any decor.

AUTOCLAVE ACCESSORIES

The Flight sterilization cassettes are made with high quality stainless steel material and silicone racks to prolong the life of the product after continuous processing and sterilization. The flight cassettes come in 5, 10, 15 and 20 instrument cassettes.

Features

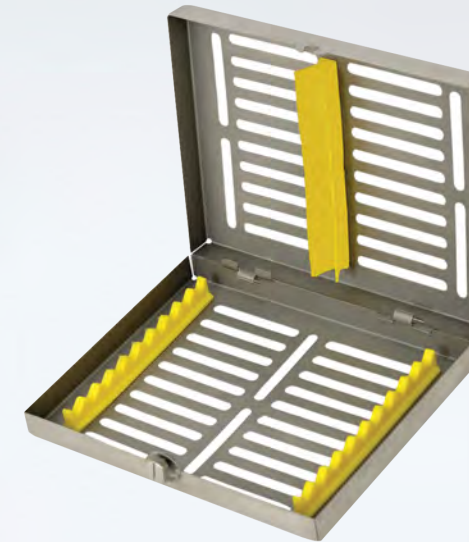

- Premium stainless steel cassettes.
- Silicone racks.
- Optional syringe clips and instrument clips.
- Easy locking mechanism.
- Two separate parts - Top lid and bottom tray.
