

## I-Max Touch / Ceph Digital Panoramic Unit

Discover the 6<sup>th</sup> sense

# Panoramic Imaging

**6<sup>th</sup> sense**

The tactile,  
intuitive approach

Enjoy the simplicity  
and functionality  
of a device that  
opens up a new world  
of working comfort  
and efficiency for you.

The tactile, intuitive digital  
**6<sup>th</sup> sense** technology  
lets you save  
precious time.

Enjoy the complete  
compatibility between  
the QuickVision  
software and the  
panoramic unit.

The I-Max Touch interface  
is the same as in your  
QuickVision imaging  
software.

All image processing and  
management features are  
immediately available.

## **RADIOLOGY | READY** Shared trust

Quality images, clear and  
informative explanations,  
an understanding of the  
treatment plan shared  
between the practitioner  
and the patient, that is  
the full meaning of a  
relationship based on shared  
trust.

The Owandy range of  
radiology units encourages  
this dialogue and contributes  
to your office's image.

# The I-MaX Touch enhances the workflow speed

## ✂ patient positioning in just a few seconds

*The patient is kept perfectly in place so the operator, guided by light beams (Frankfurt and midsagittal planes), can place the patient quickly in the ideal position. He/She is guided by the head rests and biteblock.*

## ✂ user-friendly at all times

*No waiting for the patient or the treatment team. Diagnosis is possible immediately on the screen.*

## ✂ 6<sup>th</sup> sense intuition

*Twelve complete and intuitive programs for fast, high-definition processing of your images.*

## ✂ removable sensor: cephalometry in economic mode

*Choose between a economical cephalometry or two fixed sensors for panoramic and cephalometric functions. Sharing resources is central to your office, whatever your configuration: Storage on USB memory stick – network operation.*

## ✂ greater safety

*The I-Max Touch greatly reduces the dose of X-rays needed to obtain an image.*

**The I-Max Touch has a panoramic control panel.**

**The software ergonomics have been designed for a tactile and intuitive use of all functions.**

You can operate the I-Max Touch with your fingertips. The LCD touch screen provides an overall view of the many programs and an instantaneous high-definition display of the image.

# Ergonomic use closer to you

## Opt for the 6<sup>th</sup> sense

Owandy works to increase practitioner comfort by making everyday acts easier and by saving time.

Increasing the I-Max Touch's functionality through immediate, obvious comprehension is essential to our research.

Never has software ergonomics provided so much intuitiveness, and that is what we show with the 6<sup>th</sup> sense: a wealth of easy-to-use functions, fast operation and immediate results.

The 6<sup>th</sup> sense provides added comfort that makes life easier every day.

## Operate the I-Max Touch with your fingertips

Visualize your image instantaneously and with precision on the screen, as it is displayed during acquisition.

The 6<sup>th</sup> sense graphical touch screen provides access to preset standard examinations. For each one, the trajectory is optimised during exposure.

*Instant image control*  
The image appears on the touch screen in real time; the result is immediate.

*Direct use*  
Zoom and move around the acquired image using the control panel.

# Network operation and storage on a USB memory stick: a new feeling of comfort

**Profitability at the end of the day**  
**resource sharing becomes the key to profitable office management, whatever your configuration.**

- Control panel with USB memory stick (non-contractual photo)

- Optional self-carrying floor support

**Ceph option with removable or fixed sensor**

Choice between single- or dual-sensor mode at any time, depending on the intended use (panoramic or cephalometric). Each sensor can be moved using its **ergonomic handle** that facilitates the transfer.

- Optional cephalometric arm

- Ergonomic handle

**Storage on a USB memory stick: data portability**

**The I-Max Touch memorises images without being connected to the computer.**

Once transferred from the control panel to a USB memory stick, the images can be imported onto any computer in the office.

**Network sharing and program selection**

The I-Max Touch can be operated from your computer or from any workstation connected to the network (group practice).

# I-Max Touch Ceph: Digital cephalometry

The I-Max Touch produces cephalometric images of irreproachable quality (High-Definition CCD), and with a significant reduction in the X-ray dose.

- Lateral ceph image

## Flexibility

The ergonomic handle facilitates the moving of the sensor.

## Ergonomics

The reduced dimensions of the cephalometric module allow for an installation in all practices.

## A choice of 3 formats

CEPH with image format:

- 18 x 22 cm
- 24 x 22 cm
- 33 x 22 cm

- X-ray of the hand

- Symmetrical ceph image

# I-Max Touch, 12 programs and immediate diagnosis

- Program selection

**The software/  
hardware tandem  
optimises diagnosis.**

Development research has been orientated toward time-saving factors to free up the practitioner from technical constraints, to the benefit of his/her relationship with the patients.

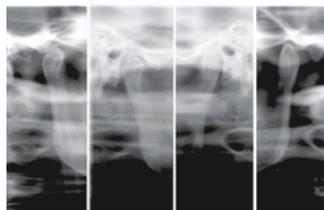

## Automatic exposure for all types of patients.

Simple and intuitive to use, the touch screen provides access to all 12 programs without changing the patient's position.

Once the program has been selected, the I-Max Touch automatically displays the exposure parameters that ensure optimum image quality.

- Maxillary sinus

- TMJ. Open and closed mouth to study condyle movement

- Child panoramic

## 12 PROGRAMS

**With 12 examination programs, the I-Max Touch performs all radiodiagnostic combinations, whatever the patient's height.**

Standard panoramic adult

Standard panoramic child

Reduced dose panoramic

Panoramic with improved orthogonality

Left Semi-Panoramic

Right Semi-Panoramic

Incisive block

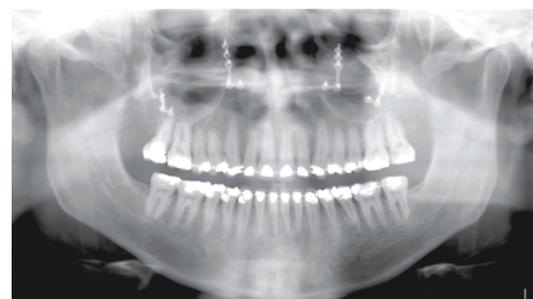

Maxillary sinus

TMJ open/closed mouth

Lateral Ceph

Frontal Ceph

Digital Panoramic Unit

## I-Max Touch / Ceph

- HF Generator At constant potential
- Focal spot 0.5 EN60336
- Min. total filtration 2.5 mm Al equivalent
- Anode voltage 60 - 86 kV
- Anode current 6 - 10 mA PAN, 6 - 12 mA CEPH
- Exposure time Pan 13.8 s / Ceph starting at 4.5 s
- Column Motorised telescopic
- SID (Source to Image Distance) Pan 500 mm / Ceph 1650 mm

- Digital sensor HD CCD + optical fiber plate
- Enlargement Ceph 1:1,1
- Resolution CCD 10.4 lp/mm
- Connection direct acquisition (network cable) and/or integrated touch screen
- Storage Computer and/or USB memory stick
- Power supply 100-120 V, 220-240 V, 50/60Hz
- Amperage 8 A

## graphical interface and functions

- 1 Message field
- 2 Display the image stored in memory
- 3 Previous/next program
- 3b Scroll through programs
- 4 Automatic or manual mode indicator
- 5 Adult/child selection
- 6 Corpulence selection
- 7 Select anterior focal trough
- 8 Test/X-Ray mode
- 9 Manual KV/mA setting
- 10 Return to main screen
- 11 Zoom

- 5 Adult Mode
- 5 Child Mode
- 6 Large Corpulence
- 6 Medium Corpulence
- 6 Slender Corpulence
- 7 Receding dentition
- 7 Standard dentition
- 7 Advancing dentition
- 8 X-Ray Mode Active
- 8 Test Mode (X-Rays deactivated)

**Owandy**  
since 1984

**Owandy,**  
**a worldwide actor in dental imaging.**

With its long experience in digital imaging, **Owandy**, a worldwide actor in dental imaging, is pursuing innovation. Their know-how, acquired over the last twenty years, now enables Owandy to offer their customers one of the most sophisticated digital panoramic units in the market.

The entire team at the research and development centre has worked to create a unit that is easy to use and intuitive, producing high-definition images meeting all customer needs. The latest technologies have been used to design the **I-Max Touch**, operated from a state-of-the-art touch screen. The I-Max Touch also makes it possible to store high-definition radiological images on a USB memory stick connected directly to the control panel without even having to connect the unit to a computer. The practitioner has **total freedom of use.**

Obviously, the **I-Max Touch** can also be operated from the imaging software, like all other products of the Owandy range: the **Real Hi-T** camera, the **Krystal-X** and **DSX** sensors, etc.

Owandy is present in **54 countries** and makes more than half of its turnover in export markets.
